A Report On the work done during 4th semester subject SP of
B.Tech. Computer Engineering

Human Resource Management System

Prepared by: Name : Om Dhingani ID : 22CEUOD004 Roll No : CE 030 Computer Engineering, Dharmsinh Desai University	Prepared by: Name : Mann Desai ID : 21ITUOS019 Roll No : CE 028 Computer Engineering, Dharmsinh Desai University

Dharmsinh Desai University
2022-2023

Motive To Create This Project :

“Human Resource Management” The Main Objective of the project is to develop a Human Resource Management system for the Intranet Automation of HR Software. The HR System provides the information regarding the employees. The System has been to facilitate good Interaction/Communication facilities between the Employees and HR Administration.

About HR Management System :

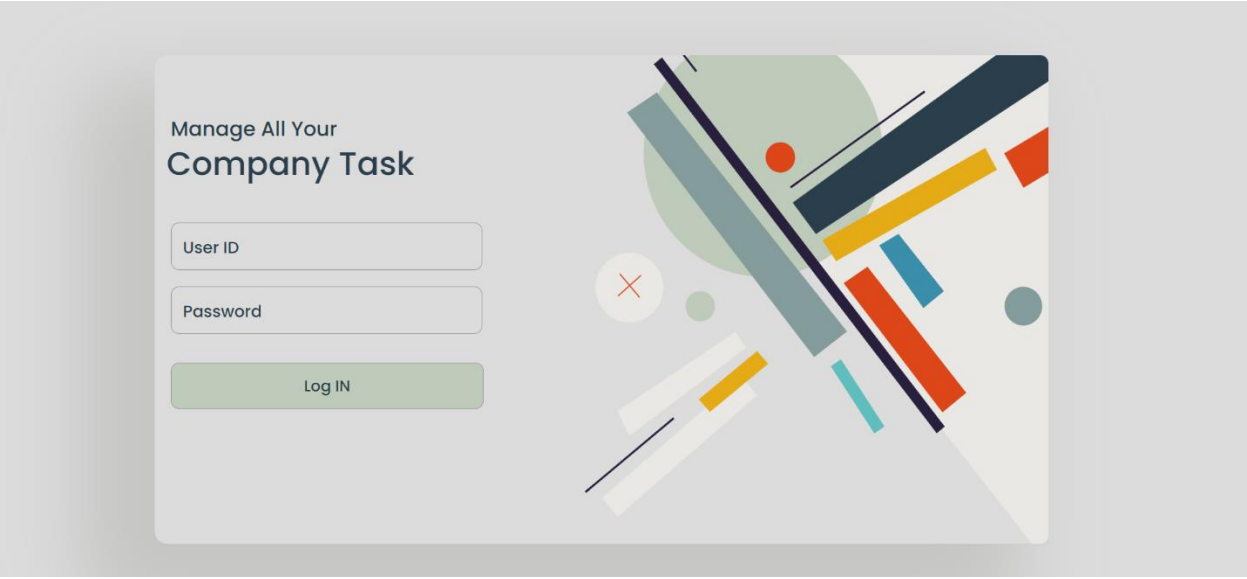
“Human Resource Management” is a system which maintain the information about the employees working in the company, their personal information, salary management. Human Resource Management has been designed to computerize and automate the operations performed over the information about the employees, their working days, performance tracking, complains and leave notes transmission, payrolls, and all other operations. This computerization of company task helps in many instances of its maintenances. It reduces the workload of management as most of the manual work done is reduced. It has also a facility where employees after logging in their accounts can see their own panel and all related options.

Overall, this project is developed to help the employees as well as HR to maintain the tasks related to company in the best way possible and reduce the human efforts.

Source Code With System Images :

GITHUB LINK

System Login :



Features of the Employees :
